1. Penerimaan Tampilan Menu Aplikasi

a. Simulasi Tampilan

b. Formating data

i. Table format data

Key	Array	Add key 1	Array	Add key 2	type
status	false	-	-	-	boolean
data	true	menu	false	-	string
		submenu	true	name	string
				waiting_approval	integer

ii. Json format data

```
{
  "success": true,
  "data": [
    {
      "menu": "Nontrade",
      "submenu": [
        {
          "name": "P0",
          "waiting_approval": 10
        },
        {
          "name": "AP",
          "waiting_approval": 10
        }
      ]
    },
    {
      "menu": "GR",
      "submenu": [
        {
          "name": "P0",
          "waiting_approval": 10
        }
      ]
    }
  ]
}
```

iii. Request format data

Header:

Token: token-> untuk user_id

2. Penerimaan notifikasi status document

Url : -

Request : -

a. Simulasi Tampilan

b. Formating Data

i. Table format data

Key	Array	Add key 1	Array	Add key 2	type
status	false	-	-	-	boolean
data	true	no_doc	false	-	string
		message	false	-	string

ii. Json format data

```
{
  "success": true,
  "data": [
    {
      "no_doc": "909090",
      "message": "berhasil terupload"
    },
    {
      "no_doc": "weqweqw",
      "message": "berhasil terupload"
    }
  ]
}
```

iii. Supporting table local android

No_doc	file	type	User_nik	message	status	approve_date
No doc	Name	Tipe	User_Nik	string	string	Tanggal
string	file	file	string			datetime
	string	string				

iv. Request format data

Header:

Token: token-> untuk user_id

3. Penerimaan semua data document – berlaku history(Done, OnProses) dan List

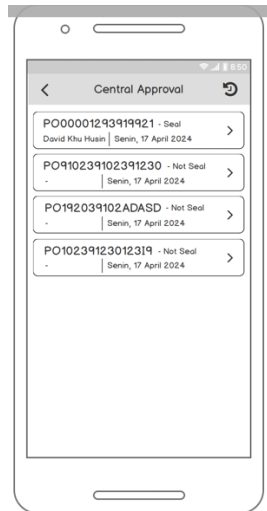

Url : -

a. Simulasi Tampilan

History :

List :

b. Formating Data

i. Table format data

Key	Array	Add key 1	Array	Add key 2	type
status	false	-	-	-	boolean
data	true	no_doc	false	-	string

		tanggal_pdf	false	-	string
		file	false	-	Base64/string
		seal	false	-	boolean
		assign	true	nama_approval	string
				tanggal_approval	string
				status	string

ii. Json format data

```
{
  "success": true,
  "data": [
    {
      "no_doc": "P000001293919921",
      "tanggal_pdf": "Senin, 17 April 2024",
      "file": "base64.pdf",
      "seal": true,
      "assign": [
        {
          "user_name": "david",
          "tanggal_approve": "Senin, 17 April 2024",
          "status": "approve"
        },
        {
          "user_name": "david",
          "tanggal_approve": "Senin, 17 April 2024",
          "status": "approve"
        }
      ]
    },
    {
      "no_doc": "P000001293919921",
      "tanggal_pdf": "Senin, 17 April 2024",
      "file": "base64.pdf",
      "seal": true,
      "assign": [
        {
          "user_name": "david",
          "tanggal_approve": "Senin, 17 April 2024",
          "status": "approve"
        }
      ]
    }
  ]
}
```

iii. Request format data

Header:

Token: token-> untuk user_id

Body :

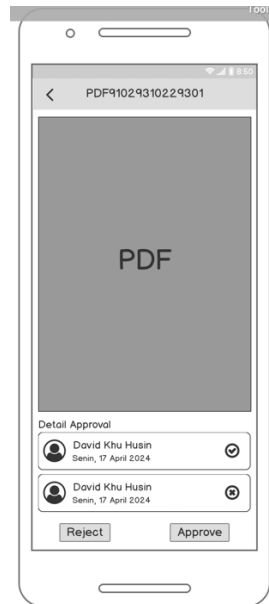

type_doc: 'po' -> tipe dokumen,

status: 'open' | 'done' | 'onprocess'

Pengiriman Data :

1. Pengiriman data approval

a. Simulasi Tampilan

b. Formating Data

i. Table format data

Key	Array	Add key 1	Array	Add key 2	type
type	false	-	-	-	string
no_doc	false	-	-	-	string
user_nik	false	-	-	-	string
status	false	-	-	-	string

ii. Json format data

```
{  
  "type" : "P0",  
  "no_doc": "PDF91029310229301",  
  "user_nik": "0488375",  
  "status": "approval"  
}
```

iii. Supporting table local android

No_doc	file	type	User_nik	message	status	approve_date
No doc	Name	Tipe	User_Nik	string	string	Tanggal
string	file	file	string			datetime
	string	string				

iv. Pengembalian format data

‘status’: ‘true’ | ‘false’

‘message’: ‘berhasil dikirimkan’ | ‘gagal dikirimkan sudah diapprove’
